

## Claims

1. A harness attachable to an air tank of a self-contained breathing apparatus so as to enable a firefighter wearing the harness to carry the air tank, the harness including a hand grip, by which a rescuer can drag a person wearing the harness.  
5
2. The harness of claim 1, wherein the hand grip is a hand loop.
3. The harness of claim 2, wherein an upper portion of the harness includes the hand loop.
4. The harness of claim 3 including two shoulder straps, to which the air  
10 tank is attachable and to which the hand loop is attached.
5. The harness of claim 4, wherein the hand loop and the shoulder straps are fabric or leather straps, which are sewn to one another.
6. The harness of claim 4, wherein the hand loop and the shoulder straps are flexible straps, which are attached to one another.
7. The harness of claim 1, wherein the harness has a rigid frame, to which  
15 the air tank is attachable and to which the hand loop is attached.
8. A self-contained breathing apparatus harness provided with a hand grip, by which a rescuer can drag a person wearing said harness provided with the hand grip.
9. The harness of claim 8, wherein the hand grip is a hand loop.
10. The harness of claim 9, wherein an upper portion of the harness  
20 includes the hand loop.
11. The harness of claim 10 including two shoulder straps, to which the air tank is attached and to which the hand loop is attached.

12. The harness of claim 11, wherein the hand loop and the shoulder straps are fabric or leather straps, which are sewn to one another.

13. The harness of claim 11, wherein the hand loop and the shoulder straps are flexible straps, which are attached to one another.

5        14. The harness of claim 8, wherein the harness has a rigid frame, to which the air tank is attachable and to which the hand loop is attached.
